Duration:

35 hours

Total Cost:

900€

HRDA Subsidy:

700€

Actual Cost:

200€

Unemployed:

Free

The program has been approved by HRDA.

Enterprises/organisations participating with their employees, as well as unemployed people, who satisfy the HRDA's criteria, are entitled to subsidy.

The aim of this training program is to equip the company with the tools needed to achieve its strategic goals in preventing workplace accidents and enhancing the sense of safety in the work environment. Achieving health and safety objectives requires the active involvement of staff in safety and health matters through the institution of the safety committee, ensuring employee participation and consultation for creating a suitable work environment.

This training program provides the necessary knowledge and skills to staff members participating in safety committees as part of the Internal Protection and Prevention Services (ΕΣΥΠΠ), enabling them to carry out their duties actively and effectively and contribute to cultivating a safety culture within their organization.

Additionally, it ensures the company's compliance with the legal framework of the Republic of Cyprus regarding workplace safety and health, as it is a legal requirement (Regulation ΚΔΠ 158/2021) for the employer to appoint ΕΣΥΠΠ and provide appropriate and sufficient training to employees who carry out ΕΣΥΠΠ duties.

Target Audience:

- Employers or their representatives conducting internal protection and prevention activities
- Management executives involved in safety committees
- External Protection & Prevention Services (ΕΞΥΠΠ) and Safety Officers seeking knowledge updates
- ΕΞΥΠΠ candidates, as required by their approval criteria

TRAINING CERTIFICATE

Upon completion of the program, participants will receive a Certificate of Attendance, stating that the program was approved by the Human Resource Development Authority

Training Objectives

Knowledge Level:

- Express the provisions and requirements of the Law and Regulations on Occupational Safety and Health
- Identify occupational risk assessment methodology
- Identify key sources of workplace health and safety hazards
- Establish legal requirements and good safety practices in everyday operations

Skills Level:

- Define protective measures against workplace hazards
- Coordinate effective implementation of the Written Risk Assessment Study
- Contribute to the implementation of preventive measures to avoid workplace accidents
- Conduct workplace inspections to identify sources of hazards

Attitudes Level:

- Recognize their important role in fostering a culture of health and safety
- Adopt internal procedures and control measures to prevent workplace accidents
- Support their company in achieving health and safety objectives
